## Foundation of an Updo

SEVEN Haircare Formal Styling Product Picks – Loft, Polish Balm, Working & Classic Spray

### Sectioning

Sectioning is the most important element to any style. Create clean sections and subsections to stay neat and organized. Your curls and style will turn out better because you have a plan and can see what you are doing.

### Creating a Base

If you don't have a solid foundation the style will start to slip and slide down. You can create a base with elastics or Bobby pins at the base of the style.

### Start Pinning

Pin and secure hair nearest to the foundation into the base to create structure.

### Build Top & Sides

Use back combing and proper products to create volume at the crown and sides.

### Detail Work

Start to add detail to sides. This could be twists or braids. Secure the hair pins and use working spray for control.

### Optional: Add Decor

Once the hair is all positioned use a firm hold or classic spray to set. You can add clips, combs, pins, flowers or a veil to add a point of interest to the style.
